GENERAL INFORMATION: Tax Code Section 26.04(c) requires an officer or employee designated by the governing body to calculate the effective tax rate and rollback tax rate for the taxing unit.

This sample worksheet is for school districts only. Water districts as defined under Water Code Section 49.001(1) should use Comptroller Form 50-858 Sample Water District Rollback Tax Rate Worksheet . All other taxing units should use Comptroller Form 50-856 Sample Tax Rate Calculation, Taxing Units Other Than School Districts .

The Comptroller's office provides this sample worksheet to assist taxing units in determining tax rates. The information provided in this worksheet is offered as technical assistance and not legal advice. Taxing units should consult legal counsel for interpretations of law regarding tax rate preparation and adoption.

The effective tax rate enables the public to evaluate the relationship between taxes for the prior year and for the current year based on a tax rate that would produce the same amount of taxes (no new taxes) if applied to the same properties that are taxed in both years. When appraisal values increase, the effective tax rate should decrease.

Most school districts calculate a voter-approval tax rate that is split into two separate rates:

- 1. Maintenance and Operations (M&O): The M&O rate is the portion of the tax rate that raises taxes for any lawful purpose other than debt service for which a taxing unit may
- spend property tax revenue. This rate accounts for such things as salaries, utilities and day-to-day operations.

 2. Debt: The debt tax rate includes the debt service necessary to pay the school district's debt payments in the coming year. This rate accounts for principal and interest on bonds and other debt secured by property tax revenue.

In most cases the voter-approval tax rate exceeds the effective tax rate, but occasionally decreases in a school district's debt service will cause the effective tax rate to be higher than the voter-approval tax rate.
